## FINANCIAL AND COMMERCIAL

THURSDAY, April 26-6 P. M. The stock market opened strong this morning, but afterwards weakened under vague apprehensions reafterwards weakened under vague apprehensions re-specting the effect here of the panic on the London Stock Exchange. These, however, were unwarranted, as the fact that all our business with Europe is transacted on a specie basis removes any danger which might otherise exist of a disturbance of monetary affairs on this wise exist of a disturbance of monetary affairs on this side in sympathy with such a condition of things abroad. The influences formerly exerted upon the money market here by foreign financial and commorcial news of moment are now confined to gold and foreign exchange, and all derangement outside of these is due to moral and not to material causes. There is, consequently, nothing in the tone of the advices from Europe teachers, the property of the state of alarm or distrust, except so far as they may in dicate a return of our securities, and the more of these that are sent back to us the higher gold and exchange will of course go; but we have not improbably already received the worst news growing out of the Austrian-Prussian rapture, unless it should eventuate in actual and prolonged hostilities. In any event, howeither in the general markets or on the Stock Exchange, national gold-bearing securities, perhaps, excepted, and the latter will be strongly supported by the policy of the

At the carry season of the open board New York Central (sales 1,400 shares) sold at 93% a %, Eric 73%, Hudson River 110, Michigan Southern (sales 1,000 shares) 83%, Cloveland and Pittsburg (sales 1,000 shares) 84 a 83%. Cleveland and Toledo 106%, Rock Island 122%, horthwestern (sales 1,800 shares) 29% a 20%, preferred 59%, Fort Wayne (sales 1,100,chares) 99%, Ohio and Mis-sissippi certificates 26%, Canton 57%, Cumberland 45, rm. New York Central closed ¾ higher than at the Central 1, Northwestern preferred %, Cleveland Foledo ¼, Rock Island ¾, Fort Wayne ¼, Western Jaion Telegraph 134. Michigan Southern was ¼ lower, Eleveland and Pittsburg ¼, Mariposa preferred ¾. Government securities were freely dealt in. Coupon five-wenties of the 1862 issue were ¼ higher, 1864 issue ¼. eeven-thirty notes of the first and third series declined & second series 1862.

action lower, except for Rock Island, under the un-verable European advices by the Nova Scotian, report-g a continuance of the panic in the funds on the Lonon Stock Exchange. Five-twenties were quoted on the 3th inst. at 67% a % ex-dividend, a circumstance which ed some to exasgerate the decime, which is elight, as no bonds would have been worth about 70%, with included, against 71% a % on the previous This, however, leaves a margin for profit upon ess, the old five-twenties here showed no symptoms of reakness, and sales were made as high as 106% on the treet after the receipt of the news. All descriptions of oreign securities were depressed, and Eric suffered a arther fall of 1½ per cent, and alinois Central of 1½, arther tail of 1/2 per cent, and alloos Central of 1/2, be former being quoted at 53 a 1/2 on the 13th and the atter at 79 1/2 a 1/2. Consols, too, were heavy at 85 1/2 a 5 1/4—a wider quotation than is usually given, which aduces us to believe that there was not much change store is to believe that there was not much change them from the previous day, when they were reported \$6\frac{1}{2}\_6\$ a \frac{1}{2}\_6\$. Three failures on the Stock Exchange in asequence of the general decline were reported, and the tent to which the shares of a large majority of the new impanies were held had proved to be much greater than supposed, and a settling down of these securities into stronger hands was looked for. Later, the advices by the Africa reported a further falling off in American securities. Five-twenties closed in London on the 14th at 67 a 67%, Illinois Central 79 a 80, Eric 52% a 53. Conels were steady at 85% a 86%.
At the half-past two board the market was dull, but

teady at the decline. New York Central closed 1/2 ower than at the first regular board, Erie 1/4, Reading 1/4, Michigan Southern 1/4, Cleveland and Pittsburg 1/4, Northwestern 36, preferred 36, Cleveland and Tolodo 34, this and Mississippi certificates 36, Port Wayne 36, Atantie Mail 36, Quicksilver 36. Rock Island was 36 higher. Alton and Terre Haute, and Illinois Central ere unaltered. Government securities were firm, and supon five-twenties, of the 1862 issue, advanced 1/2.

At the half-past three open board the election of Mr. fard to the Presidency for the ensuing year was announced. The markat continued and the markat continued and the president sold at 92%, Eric 75, Reading 104%, New York Central sold at #25%, Erie 75, Reading 105%, Michigan Southern 83, Illinois Central 120%. Afterwards the market closed dull, but steady, and at half-past five New York Central was quoted at 92% a %, Krie 72% a 73, Hudson River 110 bid, Reading 104% a 3%, Michigan Southern 82% a 5%, Cleveland and Pittaburg 82% a 3%, Rock Island 123% a 3%, Northwestern 29% a 14, preferred 58% a 34, Fort Wayne 9834 a 34. Ohio and dississippi certificates 26 a 34, Canton 563; a 34, Quick-

The money market remains easy to the Stock Ex-change at 4 a 5 per cent, and first class commercial paper at sixty days is rated at 6 a 6 %, and beyond that range at 7. The Treasury policy favors prolonged monetary case, and there is every probability that the Secretary will seen announce that no further temporary deposits will be received by the Sub-Treasurers, and that the rate to ave per cent, say after the 15th of next month. This will have the effect of throwing more money than hitherto into Wall street, which will of course be available for speculative uses. The proposed course of Mr. McCulloch in this respect is imperatively called for in view of the present condition of the Treasury, the idle balance in the Sub-Treasury here this evening

advance to 123, a subsequent relapse to 127½, and a final recovery to 127½ a 128, the closing quotation at five P. M. There was a brisk borrowing demand for coin for delivery and the supply was scarce, loans being generally made at 7-32 a 14 per cent per diem. The payment of the May tittle more than twenty millions will be disbursed on this account, nearly half the amount will be due to

dvance, and the supply of bills extremely limited. Bankers' bills on England at sixty days closed at 108%; three days 109½, commercial bills 107½ s 108, frances at sixty days 5,25 a 5,20, short eight 5,17½ a 5,15. The decline of 2d., the equivalent of four cents, in cotton at Liverpool during the week ending on the 14th inst., is regarded as favorable to diminished ship-ments at present, while the condition of the European market for American alike with other securities predisposes drawers to calculate upon a further re-turn of five-twenties pending the settlement of the much vexed German question. The following statement indi-cates the course of our leading securities on the London Stack Exchange, together with the price of consols during the last four months, and we append the latest quotations for gold known in Europe on the dates men-tioned, by which the extent of the decline in the former

Petroleum and mining etocks, were dull, but generally steady. At the first board Electric Oil closed Sc. higher than at the same time yesterday; Consolidated Gregory Gold was 26c. lower, Liebig Sc., Quartz Hill 53c. At the second board Consolidated Gregory Gold closed 25c. lower, seiling at \$16 50; Quartz Hill 25c., seiling at \$4 50. Benchoff Run sold at \$11, Buchanan Farm 38c., First

There appeared to be some danger at the time the Stock Exchange removed into the new building in Broad street that the open board, which had its inception in speculative fever of the war, would be so far eclipsed bowed out of business as soon to cease to have an nos. Business was then very dull, and there was nosi general complaint among the brokers that they were not making enough to pay their office expenses. But the removal of the regular Board from its former pent-up quarters in 'Change alley, William street, has proved about equally beneficial to itself and its more democratic next door neighbor, and it is noticeable that the jealousy with which the old and the new organiexitons regarded each other upon the occasion of the removal now exists only in a very modified degree. The members of both boards are beginning to see that there is field enough for all, and that the more there are the merrier the game of speculation among themselves is likely to be, and it is safe to state

that however great the outside support to the marks may be at any time, the larger portion of the bus ness transacted is on account of the brokers themselves who are the real professional speculators in stocks. So much is this the case that many of the younger men hear of the beaut do a nursely speculative business.

Activity is the life of the Stock Exchange, and much has been done to develop its growth by the policy of the board during the last three years. Before that time it was controlled by very narrow and exclusive views, embodying some of the most cherished traits of old fogyism. It was an association which asserted its importance and strove to protect its monopoly by black-bailing nearly all who had the presumption to apply for admission within the sacred portals guarding the chamber where eat the elect; and all the graybeards of that are the first production of the p bor where sat the elect; and all the graybeards of the august assemblage felt themselves not as other men, but as high priests of the great temple of Mammon, and frowned upon the outer world accordingly, forgotting their own democratic origin when they gathered under the friendly shelter of a tree in Wall street, and had not be the street, and had not be the street of the stree a few years what a change! It is a step from the sian of an of freezo dealer to a palatial edifice. Had the polic of the Stock Exchange been more liberal in the first in stance, the open board would in all probability never have been established; but it was the only thing the opened the eyes of the Stock Exchange to its own resulting about sightlenger. It had be exceeded as opened the eyes of the Stock Exchange to its own previous short-sightedness. It led to concessions and the gradual removal of prejudices against new admissions; in short, to the adoption in self-defence of a free trade instead of a protective policy. And the result is that the dealings in stocks have targety increased, and that a far larger number of men have been calisted in the business of brokers and speculators in consequence. Government securities are gradually becoming a prompant feature of the dealir transcriptors at the bearing.

will take its place. The gold of California and Colorado and the silver of Nevada will unite with the copper of the Lake Superior region to claim the attention of investors and speculators in the New York stock market, and there will be work enough for all the boards, regu-lar, public and petroleum, and the old Stock Exchange will find that it has lost nothing by laying acide its old prejudices and extending the hand of good fellowship to

## A LOST CITY.

REMARKABLE DISCOVERY IN MEXICO

The Cordova Rebel Exiles Find a Ruined and Abandoned City of the Ancients.

Christian Churches and Crosses Among the Ruins. Le.

Our Cordova Correspondence. CORDOVA, MEXICO, March 27, 1866

No little excitement prevails among the Americans in Mexico in regard to an unexplored district of country, hitherto unknown to the authorities, lying about three hundred miles northwest from Jalapa, and which Gen. R. Lyon, late of the Confederate army, is now engaged in surveying. In nearly every department in the empire are to be found immense bodies of land which the foot of the Spaniard never trod; many of them impenetrable forests, inhabited only by beasts of prey, and whose shades the imagination of the native Indian had peopled with demons and evil spirits, upon whose domain it was more than death to trespass. Such is the land which

While the Imperial Commissioners were investigating government titles to lands to be allotted to emigrants, they learned of the existence in the "Tierra Caliente" of the district in question, and early in October last an exploring party was despatched to this "tierra incognita." Upon reaching Mesa de Mecatepeque, a small village nearest the borders of the forest, they were counselled by the Indians to proceed no further, as no human being ever passed the confines of their cleared lands and returned alive; demons were said to dwell in every hill, giants of hideous men made their abode beside every streamlet, while monsters of every form and guise stood ready at every footstep to seize and devour the unwary traveller; all was "mala," and not one syllable of good could be uttered in favor of the land.

Unable to procure sufficient assistance from the natives, the party proceeded to make their explorations as

Unable to procure sufficient assistance from the natives, the party proceeded to make their explorations as best they could. The forest was peculiarly dark and dense and the jurgle almost impenetrable. With difficulty they cut their way through the undergrowth, and, being unacquainted with the Yankee method of "blazing" trees, they marked their way by tying hide ropes to trees and bushes to mark their trail. At the distance of several leagues in the interior they discovered existence not the slightest tradition prevails. Becoming exhausted by their labors, the party, without prosecutgreat interest in the result of the exploration, and at once endeavored to send a stronger and more efficient party to prosecute it, selecting General Lyon, of Kentucky, as commander of the expedition. The General is admirably adapted to the post. He was Lieutenant Colonel of the Second (rebel) Kentucky infantry, and was captured by General Grant at Fort Donnelson. Sub-

rice old, but which are known to have been the abodes of elegance and luxury within eighty years.

Crime in Utah.

A "GENTILE" ASSASSINATED IN SALT LAKE CITY. [From the Salt Lake Videtta, April 4.]

From time to time during the past interieen years the people have been almost painted with the announcement of dark and fearful crimes committed within the limits of this Territory. Crimes of the greatest magnitude and of the bisokest character have been perpetrated, and in no known metance have the guilty parties been brought to the tribunal of justice. The Mountain Meadow mansacre, the Parish, Potter and Forbes murders, the assassination of Sergeant Pike on the main street of Salt Lake City in broad daylight were all committed with an impunity and immunity from punishment having no paradic eleswhere in the country. Last Monday evening the community was astounded by the intelligence of another foul assassination committed on Theatre street, only a few steps cast of Main street. The man who was assassinated was known throughout Newada, and more particularly at Austin and Rocae River, as one of the lesst and most reliable citizens of that State.

A few days ago he was lawfully joined in marriage, by Judge Mounty, one of the Associate Judges of the Inited States Courte in and for this Territory, to a lady of this city, who was claimed by the Mornon leaders as the wife in polygamy of a Mormon, now absent on a foreign mission. This lady, by the sanction of law, and by the authority of one of the highest legal officers of the Territory, abandoned the false position in which she had been placed, and legally Joined herself in marriage with Squire Rassassion. The lady, fearing that efforts would be made to take her children from her, caused a writ of habean corpus to be intended from the United States Court for the purpose of bringing her children before it and obtaining a decision whether she was sociited to the court for the purpose of the legal and constitutional right of polygamy. Additional time being required, and by

half an hour thereafter Brassheld, when within a few steps of the hotel where he resided, and when in company of the United States Marshal, was abot in the back, and within one hour from the time he left the Court House he was lying on his bed a dead man, thus adding one more link to the already long list of dark and bloody crimes now discreding the black.

## BOARD OF ALDERMEN.

Proposed Erection of a New Washing-ton Market-Another Vote from the

Front of the City Hall about five o'clock.

Pawmbrokers Shirking the Payment of Revenue Stamps.

TO THE EDITOR OF THE HEMALD.

I, and thousands of others whe are placed in the same position as myself, which is very destitute, are compelled, as we work for a small compensation for our labor, to frequent pawn offices and put up things to keep our families until Salurday night, when we redeem them again. So week after west we do this. Now the main point is this; It seems that by law these pawnbrokers are compelled to place of their checks, or raintrickets, a five cent revence simms, and the pawner is obliged, to pay the same, herides the insurest on the money. Now, its. Editor, I will appeal to you to know, also to the public; if this is not too hard for the poor to be paying twenty-five per cent interest and also to pay on each ticket are cents for a seems. By loss in asking you to call the public asterdies to this to see whether the Legislature would feat that belief the matter and relieve the poor of this tax, which, undertakely, several thousand are compelled to seat it to, as the pawnbrokers cannot a form of the main themset which they my they receive. Flams to may they receive. Flams to may they receive the poor of this tax, which undertakely, several thousand are compelled to be made they were they my they receive. Flams to make they were then they are they receive. Flams to make any their receives the matter and relieve they are they receive.
